Dear Mr. Holland,

Iowans for Medical Marijuana must respectfully withdraw from the Coalition for Rescheduling Cannabis.

After the ruling in **Gonzales v. Oregon**, 546 U.S. 243 (2006), Iowans for Medical Marijuana determined that state rescheduling is a prerequisite to federal rescheduling, based on the scheduling criteria in Iowa Code §124.201(1) & §124.203(1) (2009), which is derived from the Uniform Controlled Substances Act, 9 ULA 42 §201(b) & 9 ULA 53 §203(a) (1994), which, in turn, is derived from the Controlled Substances Act, 21 U.S.C. §811(c) & 21 U.S.C. §812(b)(1).

The holding in **Gonzales v. Oregon**, 546 U.S. 243 (2006), combined with the policy statements of the Obama Administration, make it clear that the federal regulatory scheme for controlled substances (implemented by federal regulations) is driven by state policies on controlled substance (implemented by state laws).

The ruling in *Gonzales v. Oregon*, at page 258, is unequivocally clear:

The Attorney General has rulemaking power to fulfill his duties under the CSA. The specific respects in which he is authorized to make rules, however, instruct us that he is not authorized to make a rule declaring illegitimate a medical standard for care and treatment of patients that is specifically authorized under state law.

Federal scheduling of controlled substances is a rule making process, 21 C.F.R. 1308.43(d) (April 1, 2010):

The Administrator shall, before initiating proceedings for the issuance, amendment, or repeal of any rule either to control a drug or other substance, or to transfer a drug or other substance from one schedule to another, or to remove a drug or other substance entirely from the schedules, and after gathering the necessary data, request from the Secretary a scientific and medical evaluation and the Secretary's recommendations as to whether such drug or other substance should be so controlled, transferred, or removed as a controlled substance. The recommendations of the Secretary to the Administrator shall be binding on the Administrator as to such scientific and medical matters, and if the Secretary recommends that a drug or other substance not be controlled, the Administrator shall not control that drug or other substance.

In 2008, Iowans for Medical Marijuana filed a petition to reclassify marijuana in Iowa by removing it from Schedule I of the Iowa Uniform Controlled Substances Act, Iowa Code 124.204(4)(m). On February 17, 2010, the Iowa Board of Pharmacy found that marijuana no longer meets the statutory criteria for inclusion in Schedule I of the Iowa Uniform Controlled Substances Act and recommended the Iowa Legislature remove it from that classification:

Since 1996, a total of 14 states and the District of Columbia have enacted medical marijuana legislation, and yet not one of those states has reviewed the classification of marijuana under the Uniform Controlled Substances Act or applied for federal reclassification of marijuana. All of the coalition members have either failed to seek state reclassification of marijuana under their own state's Uniform Controlled Substances Act and/or file civil actions in state courts complaining of the failure of their own states to apply for federal rescheduling. Because of this failure on the part of the coalition members there is a conflict of interest between Iowans for Medical Marijuana and the other coalition members which requires Iowans for Medical Marijuana to withdraw and separate itself from the coalition.

Please remove our name and contact information from the Coalition website:

We sincerely wish you all the best in your endeavors.

Sincerely,
